

WAI-TI BIO

Origin: New-Zealand

WAI-TI is a hop that has been bringing a great freshness of lime and nuts since it was released in 2011.

It inherits the Mittelfrüh and has the Liberty as its grandfather.

With a low level of alpha acids and cohumulone,

WAI-TI develops a very mild bitterness that makes it very suitable for single hop beers.

Note that when added at the mid/end of the brew, citrus fruits are placed in the background and the nuts take over.

TYPE OF HOP:

Aromatic

USE:

Pale Ale, Lager, IPA, Wheat

SUBSTITUTES:

Riwaka
