

CALLISTA

Callista is a relatively new hop that was developed a decade ago at the Hop Research Center in Hüll as part of the research for the development of aroma varieties.

It is a descendant of the Hallertau Tradition and a Huell male. The word « Callista » can have different meanings, but in Greek it means «the most beautiful» ;-).

Due to a low cohumulone content, Callista will provide a smooth and balanced bitterness.

TYPE OF HOPS

Aromatic

FORM

Pellets

ORIGIN

Germany

ACIDS

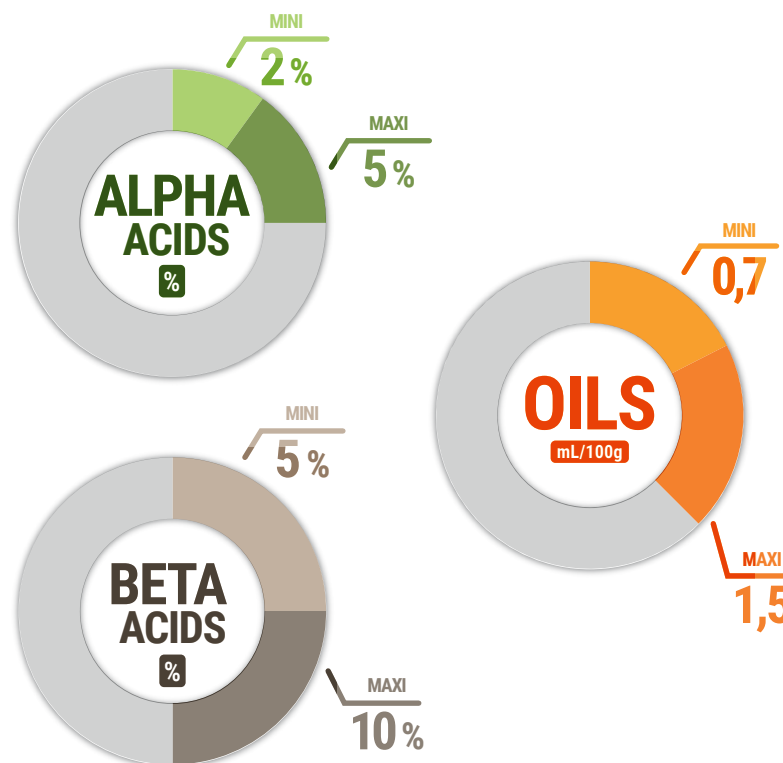

Alpha: 2 - 5%
Beta: 5 - 10%
Cohumulone: 15 - 21%

CUMULATIVE OILS

0,7 - 1,5mL/100g

POSSIBLE SUBSTITUTES

This hop is quite unique

USE

Ales, IPA

CHARACTERISTICS

Strawberry, Pear, Caramel, Orange
